

TNI Cage nut for leveling

Information

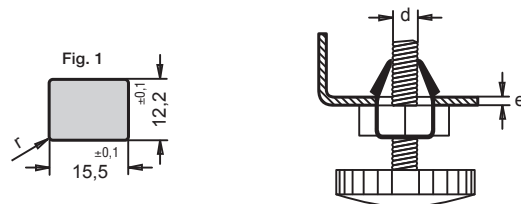

The cage nut for leveling offers a safe and vibration-resistant solution for the fixing of adjustable feet in the white goods and furniture industries and for general industrial applications.

These nuts can easily be push-mounted on the outer surface of the support or frame on an assembly line after painting or enameling has taken place. The pressure exerted by the wings of the cage help to keep the nut fixed in place.

TNI Cage nut for leveling

For Metric bolt Nominal d e	Part n° TNI	a	b	c	G	F	Box quantity	Outer box quantity
